Al-Bayan University Profile

- Al-Bayan University was established based on the Council of Ministers Decision No. (369) for the year 2013.
- The colleges listed below were approved based on Ministerial Order No. 3966 on 20/10/2016, effective from the academic year 2016/2017:
    1. College of Pharmacy
    2. College of Law
    3. College of Health and Medical Techniques / Department of Medical Laboratory Techniques
    4. College of Business Administration, which includes the following academic departments:
        a. Department of Business Administration
        b. Department of Accounting
- College of Dentistry was established based on the Private Higher Education Department Book No. 6646 on 20/9/2017 for the academic year 2017/2018.
- College of Nursing was established based on the Private Higher Education Department Book No. 6768 on 28/9/2017 for the academic year 2017/2018.
- The College of Technical Engineering was established based on the Private Higher Education Department Book No. 13846 on 23/11/2021, including the Department of Medical Instrumentation Engineering Techniques for the academic year 2021/2022.
- Department of Financial and Banking Sciences in the College of Business Administration was established based on the Private Higher Education Department Book No. 4885 on 17/5/2022 for the academic year 2022/2023.
- Department of Political Science in the College of Law was established based on the Private Higher Education Department Book No. 1766 on 9/11/2022 for the academic year 2022/2023.
- Center for Continuing Education was established based on Ministerial Order No. 7186 on 4/9/2023.

- College of Fine Arts / Department of Design was established based on Ministerial Order No. 17239 on 17/10/2023.
- College of Education / Department of English Language was established based on Ministerial Order No. 17239 on 17/10/2023.
- Department of Industrial Renal Techniques in the College of Health and Medical Technologies was established based on Ministerial Order No. 17239 on 17/10/2023.
- The following departments were established in the College of Technical Engineering:
    - Department of Computer Engineering Techniques.
    - Department of Electrical Engineering Techniques
      these were approved based on Ministerial Order No. 17239 on 17/10/2023.
- College of Engineering / Department of Biomedical Engineering was established based on Ministerial Order No. 26624 on 31/10/2024.
- Department of Laser Cosmetic Techniques in the College of Health and Medical Technologies was established based on Ministerial Order No. 26624 on 31/10/2024.
- Department of Electrical Engineering Techniques in the College of Technical Engineering was established based on Ministerial Order No. 26624 on 31/10/2024.
- . Department of Architectural Engineering the College of Engineering was established based on Ministerial Order No. 22267 on 14/10/2025
- Department of Artificial Intelligence and Robotics Engineering the College of Engineering was established based on Ministerial Order No. 22267 on 14/10/2025
- Department of Network and Cyber security Engineering the College of Engineering was established based on Ministerial Order No. 22267 on 14/10/2025

University Educational Strategy

Vision:
A creative community, pioneering research, and sustainable education.

Mission:
Al-Bayan University establishes a comprehensive educational system that responds to the needs of society and the challenges of the modern era. It is distinguished by advanced educational programs and innovative scientific research, aimed at graduating qualified individuals who contribute to sustainable development.

Goals:

1. To equip students with practical skills and critical thinking abilities, enabling them to succeed in their professional careers.
2. To promote a research culture and advance science and knowledge through the support of scientific research and innovation.
3. To strive for educational process improvement by utilizing modern technology and achieving the principles of sustainable development.
4. To provide comprehensive services to everyone, regardless of gender, without discrimination or bias.

College of Pharmacy

Vision: To prepare pharmacists who are scientifically and professionally qualified, based on a modern scientific vision that fosters research values aligned with the concepts of sustainable development and education.

Mission: To prepare pharmacists with advanced qualifications and behavioral skills that serve the concepts of sustainable development, capable of providing comprehensive pharmaceutical services to all individuals, both within and outside health institutions, and addressing health issues to achieve individual and community health. The College should also be a center for pharmaceutical education, training, and the application of scientific research.

Objectives:

1. To prepare and train qualified pharmacists with comprehensive pharmaceutical skills and knowledge to work in all health institutions across various pharmaceutical fields, including clinical, therapeutic, industrial, preparatory, and educational services for individuals, families, and communities.
2. To empower researchers, including College members and students, to keep up with and use modern research methods in conducting scientific research.
3. To develop the capabilities of College members and students by using modern technology in education and updating curricula to achieve the concepts of sustainable development.
4. To enable students to provide high-quality pharmaceutical services to all community groups without discrimination or bias.

College of Health and Medical Techniques

Vision: Building a scientific, medical and technical institution that supports health, medical and educational institutions by preparing a medical technical staff in the field of medical laboratories that will be able to participate in developing health institutions and apply medical studies on solid scientific foundations that are in line with developments in the relevant medical fields.

Mission: Choosing the best modern scientific methods in preparing the technical staff by providing qualified faculty members to deliver knowledge, information and keeping up to date with modern scientific developments in addition to providing students with scientific expertise through practical and applied training in college laboratories, and opening horizons of scientific corporations with relevant corresponding departments.

Objectives:

1-preparing specialized technical staff to serve various medical specialties (medicine, dentistry, pharmacy and nursing).

2-Contributing to the development of society through developing health services in cooperation with health and national institutions, and preparing and implementing health programs and plans, benefiting from the expertise of specialties and providing the necessary equipment to improve the quality of health services.

3-Encouraging medical and health research in the fields of medical laboratory technique and other medical specialties.

4-Supporting hospitals and health centers with medical staff specialized in medical laboratory techniques as well as filling the needs of health institutions, public and private hospitals, and private laboratories

Academic Departments in the College:

. Department of Medical Laboratory Techniques

.Department of Kidney Dialysis Techniques

.Department of Aesthetics and Laser Techniques

College of **Law**

College of Law is one of the prominent faculties at Al-Bayan University. Its teaching staff and departments continuously support the College and offer the best of their scientific and educational resources. The College includes a group of highly qualified professors with various academic titles (Professor, Assistant Professor, Lecturer) capable of providing education according to the best educational systems. The College adopts electronic organization and provides modern tools and resources to help achieve its desired mission, aiming to be one of the distinguished and academically reputable faculties. The College consists of the Department of Law and the Department of Political Science, and the study duration is four years.

Description of a Graduate from the College of Law and the Department of Political Science

A graduate is qualified in law or political science. A graduate from the College of Law who successfully completes four years of study can join the Iraqi Bar Association and the Iraqi Lawyers Union, work in the judiciary, provide legal consultations, draft contracts, follow administrative procedures in government agencies, interpret laws, provide legal advice, and keep up with legislative and judicial developments. A graduate in political science can work as a political analyst, political researcher, or in the diplomatic field.

Vision

To lead in the field of legal and political knowledge for a sustainable, aware society.

Mission

College of Law and Political Science seeks to provide distinguished legal and political education by graduating national and international competencies to promote the rule of law and Establish political ethics, in order to spread a culture of tolerance and address legal issues.

Objectives:

1. To prepare graduates qualified to work in legal and political fields.
2. To enhance scientific research in legal and political fields to serve the community and the labor market.
3. To contribute to the use of technology in developing university-level legal and political education, achieving sustainable development goals.
4. To achieve a high level of knowledge and practical skills necessary to practice the profession without discrimination or bias.

Departments in the College:

- **Department of Law**: Grants a Bachelor's degree in Law.
- **Department of Political Science**: Grants a Bachelor's degree in Political Science.

College of Business Administration

Vision

to prepare entrepreneurs with scientific competencies and social responsibility through education that combines theory and practical application, with a commitment to excellence in scientific research and contributing to community development to achieve sustainable development goals.

Mission

To offer innovative and comprehensive educational programs, conduct impactful research, and develop business leaders with ethical values and leadership competencies through a supportive educational environment that enhances critical and creative thinking, and responds to local challenges.

Objectives:

1. To enable students to enhance their leadership and entrepreneurial skills required in the job market through educational curricula designed to address contemporary business challenges, while supporting scientific research, innovation, and creativity.
2. To contribute to meeting the requirements of the digital economy and sustainable development goals through programs and initiatives that support the green economy, responsible practices, and encourage participation in them.
3. To continuously strive to develop work standards with total quality management and the continuous improvement of the educational process, ensuring that the College 's outputs serve the job market in line with the economic and social changes in Iraq.
4. To provide comprehensive educational services with knowledge-based dimensions to all College students without discrimination based on gender or ethnicity.

Departments in the College :

- **Department of Business Administration**
- **Department of Accounting**
- **Department of Financial and Banking Sciences**

College of **Nursing**

College of Nursing is one of the important Colleges in the health group. This College admits students who are graduates of preparatory studies (scientific and biological branches), in addition to accepting nursing preparatory school graduates with specific percentages. Our health institutions, including primary health care centers and hospitals, continue to suffer from a shortage of nursing staff. To meet this need, the university has decided to provide our beloved country with graduates who have scientific qualifications in the fields of education, health, technology, administration, research, and various technical specialties by opening the College of Nursing, which has specialized teaching staff, classrooms, and dedicated nursing laboratories, including laboratories for nursing fundamentals, general skills, adult nursing, and maternal and neonatal nursing. The study duration is four years.

Vision

To prepare professionally qualified nurses according to a modern scientific vision that fosters research values aligned with the concepts of sustainable development and education.

Mission

To prepare nurses with advanced qualifications and behavioral skills that serve the concepts of sustainable development, capable of providing comprehensive nursing care to all individuals in the areas of preventive, therapeutic clinical, and rehabilitative care, and addressing health issues to achieve community health. The College should also be a center for nursing education, training, and the application of scientific research.

Objectives:

1. To prepare qualified nurses with comprehensive nursing skills and knowledge to work in all health institutions in various nursing fields, including preventive, therapeutic, and rehabilitative care for individuals, families, and communities.
2. To empower researchers, including College members and students, to keep up with and use modern research methods in conducting scientific research.
3. To develop the capabilities of College members and students by using modern technology in education and updating curricula to achieve sustainable development concepts.
4. To enable students to provide high-quality nursing services to all community groups without discrimination or bias.

College of **Dentistry**

Vision

to be a leading and innovative institution in dental education, research, and community service, recognized as a hub for graduating exceptional dental professionals who integrate clinical mastery with AI and digital dental technologies to meet global healthcare standards.

Mission:

1. Deliver advanced educational programs incorporating Artificial Intelligence and digital dentistry solutions to empower students with high-level clinical and technological skills alongside ethical values.
2. Promote innovative research in digital dentistry and medical AI applications to enhance diagnostic accuracy, treatment protocols, and preventive care.
3. Actively serve the community by providing accessible, comprehensive oral healthcare and enhancing public awareness regarding oral disease prevention.
4. Foster a smart and supportive learning environment that encourages innovation, collaboration, and continuous adaptation to digital transformation.

Objectives:

1. Academic Excellence & Smart Education: Offer a modern curriculum integrating AI applications and digital dentistry tools to align with future healthcare demands.

2. Research & Digital Innovation: Encourage cutting-edge research in AI-driven dentistry and modern clinical technologies to revolutionize diagnostic precision and treatment outcomes.

3. Community Service & Health Awareness: Provide comprehensive clinical care and preventive services to diverse community sectors while leading proactive oral health education campaigns.

4. Professional & Clinical Mastery: Equip students with comprehensive clinical expertise and hands-on proficiency in utilizing smart simulation systems and modern dental tech.

5. Strategic Partnerships & Digital Growth: Foster collaborations with academic institutions and technology leaders to drive interdisciplinary progress in digital oral healthcare.

Graduates:

The College of Dentistry grants its graduates a Bachelor's degree in Dentistry after the completion of 220 credit hours over a period of 5 years, following an annual system with two semesters. Most of the courses are taught in English, covering various subjects to prepare students for practicing the profession in all health and educational sectors, contributing to the building and development of Iraqi society.

The College of Technical Engineering

About the College

the College of Technical Engineering is one of the recent additions to Al-Bayan University. The establishment of this College aligns with the government's direction and the labor market's need for graduates in technical specialties who possess modern practical and applied skills. This is supported by modern scientific laboratories and advanced curricula, supervised by a group of academic staff with exceptional academic and practical experience. The study duration is four years.

Vision

To prepare technical engineers with high engineering skills to meet the needs of society and achieve sustainable development goals.

Mission

To lead in technical education and scientific research, with a focus on digital transformation and achieving sustainable development goals to meet the needs of society and the labor market.

Objectives:

1. To enable students to acquire engineering skills that ensure academic and professional success through innovative educational programs.
2. To enhance scientific and applied research to achieve innovation and excellence.
3. To lead in digital transformation and the use of technology to achieve sustainable development.
4. To promote inclusivity and combat discrimination through a diverse and equal-opportunity educational environment.

Awarded Degree

Graduates of The College of Technical Engineering are awarded a Bachelor's degree in Engineering Technology in their respective specialties. They are eligible to apply for membership in the Iraqi Engineers Union, and the degree qualifies them to be applied engineers. Top graduates have the right to apply for graduate studies both domestically and abroad.

The College and **the Community**

The College of Technical Engineering is distinguished by its openness and interaction with the community through efforts to implement training courses and programs for teaching staff from outside the College and the general public. Additionally, students contribute to community service campaigns and social events.

Departments in the College:

1. Department of Medical Instruments Engineering Techniques
2. Department of Power Mechanics Engineering Techniques
3. Department of Computer Engineering Technique.
4. Department of Electrical Engineering Techniques

College of **Education**

College of Education was established in 2023 and includes one department, the Department of English Language. The department offers a comprehensive academic program aimed at granting students a Bachelor's degree in English. The program aims to qualify students to become experts in the English language, both in educational and professional fields. The Department of English at Al-Bayan University currently has 327 students in the second stage of the morning shift, with the evening study option being introduced due to the high demand even in the first stage.

Mission

College of Education is committed to preparing its students and equipping them with the knowledge and skills necessary to enhance their educational and linguistic competencies, contributing to increased success opportunities in both local and international work environments.

Vision

College of Education at Al-Bayan University aspires to be a leader in preparing distinguished educational cadres in Iraq, contributing to the development of a generation of teachers who possess scientific competence and pedagogical skills required to meet the demands of 21st-century education, while fostering ethical values and critical thinking in a multicultural environment.

Objectives

1. **Enhancing Linguistic Competence**
   Prepare students with high-level proficiency in the English language, enabling them to excel in diverse educational and professional environments.
2. **Developing Pedagogical Skills**
   Equip students with the necessary experiences and skills to work as effective teachers, capable of meeting the educational needs at various levels.
3. **Fostering Research Capabilities**
   Enable students to conduct innovative and independent research in linguistics, English literature, and teaching methods, contributing to the development of academic knowledge.
4. **Instilling Ethical and Professional Values**
   Promote adherence to ethical and professional standards in the educational work environment, with a focus on integrity and responsibility.
5. **Enhancing Cultural Awareness**
   Prepare students to recognize the importance of cultural diversity both within and outside

the university campus, fostering a more inclusive and understanding educational environment.

6. **Preparing Multiple Career Paths**
   Enable graduates to succeed in various professional fields, including education, translation, training, and publishing.

Career Paths

Upon graduating from the Department of English Language and obtaining their Bachelor's degree, students will have access to a variety of professional opportunities, including:

1. **Teaching**
   - Work as English language teachers in high schools and other educational institutions.
2. **Translation**
   - Practice oral and written translation in various fields, including business and academia.
3. **Language Training**
   - Work as language trainers in English language learning centers, developing language skills for learners of all ages and levels.
4. **Editing**
   - Work as language editors in publishing houses or media institutions to improve and refine written texts.

It is important to note that career opportunities are not limited to the above fields. Graduates of the department can work in various sectors due to their proficiency in the English language and diverse skills, such as:

- **Diplomatic Service** (Ministry of Foreign Affairs)
- **International Organizations**
- **Tourism and Hospitality**
- **Digital and Media Content Development**
- **Multinational Companies**, where English is a prerequisite.

These skills and opportunities equip graduates to adapt to the ever-changing job market demands.

College of **Fine Arts**

College of Fine Arts was established for the academic year 2023-2024. The College works to equip students with both scientific and artistic knowledge, providing education according to the best educational systems and offering modern equipment that supports its mission. The college accepts students from various preparatory branches, including literary, scientific, and applied sciences, along with graduates from the Institute of Fine Arts, Applied Arts, Industry, Commerce, Agriculture, Crafts Institute, and Folk Arts. The duration of study is four years, and the College includes the Department of Interior Design.

Department of Interior Design

The Department of Interior Design graduates a generation of designers who produce engineering designs infused with art, creativity, and innovation. The department focuses on producing creative and forward-thinking designs for interior spaces of various types, including residential and commercial spaces. Students are trained to design and supervise projects, ensuring they meet human engineering standards and functional and aesthetic requirements. The department also supports its graduates with seminars and workshops to keep up with technological advancements in the field.

Vision

The vision is to enhance the academic level of graduates and broaden their understanding of design systems, expanding their creative and artistic perspectives that blend engineering and design. Students are trained to handle design dimensions, analyze, and study the needs of the target audience. Additionally, postgraduate studies (Master's and Ph.D.) are available in Iraq in Interior Design.

Mission

The College aims to adopt the best academic methods for delivering knowledge to students while keeping up with the evolving design trends. The mission includes strengthening students' and researchers' knowledge through a distinguished academic staff and equipping students with the scientific and practical expertise gained from the designs and projects they execute under the supervision and guidance of professors, focusing on residential and commercial designs of various types and functions.

Objectives

1. Prepare specialized design professionals in interior design with scientific knowledge and design competence to serve the target groups that benefit from design.

2. Contribute to highlighting the importance of interior design as it directly interacts with space occupants and impacts their psychological perception by enhancing theoretical and practical aspects of interior design.
3. Support government institutions by providing qualified engineering staff who contribute to creating functional and aesthetically pleasing design environments that support architectural designs.
4. Attract high school graduates from scientific and literary branches, as well as those from institutes like Fine Arts, Industry, and Commerce.

Career Paths

Graduates can work in various fields, including:

- Employment in ministries within engineering departments.
- Teaching arts education in high schools.
- Teaching at Fine Arts Institutes.
- Working in engineering companies specializing in interior design.
- Preparing designs, supervising their execution, and offering design consultancy.
- Working in companies specializing in kitchen, furniture, and interior space designs (both public and private spaces).
- Membership in the Artists' Syndicate.

The list of potential jobs is not exhaustive, as graduates may find opportunities in different sectors due to their proficiency in design and other personal skills.

Examination System in the College of Fine Arts

The examination system in the College of Fine Arts follows a semester system. The courses are divided into theoretical, practical, and applied materials, with grading systems varying according to the type of course.

College of Engineering

The College of Engineering aims to excel in providing educational and research services in all engineering and technology fields. It prepares specialized engineers capable of occupying various positions in both the public and private sectors, contributing to the development of society and the local and regional economy. At the same time, the College strives to educate its students to become responsible citizens who uphold human and ethical values and are conscious of their responsibilities towards their religion, country, and people.

Mission

The mission of the College of Engineering is to prepare distinguished engineering cadres capable of applying engineering knowledge in practice based on solid scientific principles. The College aims to produce credible scientific research that provides solutions to engineering problems faced by various sectors, as well as to serve the community and strengthen communication with the labor market to develop engineering education methods according to market needs.

Core Values of the College of Engineering

In alignment with the university's commitment to its values, the College of Engineering believes in the following core values:

- National affiliation.
- Leadership and creativity.
- Teamwork spirit.
- Integrity and transparency, fighting corruption wherever it exists.
- Justice and equality.

Objectives

1. Prepare and train students for various engineering professions by ensuring their understanding of engineering principles within their specialized field, enabling graduates to address technical problems and contribute to finding scientific solutions.
2. Encourage and motivate students to acquire knowledge through study, research, and developing their independent thinking, self-confidence, and self-learning skills, while keeping up with scientific sources.
3. Equip students with basic principles in management, economics, and selected humanities to enhance their qualifications for leadership roles in society.
4. Conduct and publish academic and applied research to enrich knowledge in the engineering field and solve engineering problems in both government and private sector companies.

Departments of the College

1. Department of Biomedical Engineering
2. Department of Architectural Engineering
3. Department of Artificial Intelligence and Robotics Engineering
4. Department of Network and Cyber security Engineering
